Course

- Skilvul UI/UX Design Mastery**
UI/UX Design, Nov - Okt 2021
Worked on a case study for an Online Learning Mobile App and studied all key elements in UI/UX Design. Designed the Online Learning Mobile App through several processes, including Design Thinking, User Flow, Wireframing, UI Style Guide creation, UI/UX Design, and Prototyping.
- Sanbercade**
UI/UX Design, Aug - Nov 2021
Learned the design process using Figma, conducted user research, determined project strategy, scope, and information architecture, and developed wireframes, mockups, and other design deliverables.

Work Experience

- PT. Lanius Inovasi Indonesia (Machine Vision) - Malang**
UI/UX Design, July 2023 - Present (2 year, 10 months)
Collaborated with product and project teams in designing and developing digital solutions based on business and operational needs. Responsible for conducting research, designing user experiences, and implementing designs across various enterprise systems.

Responsibilities & Achievements:
 - Collaborated with Business Analysts to design system flows aligned with business requirements and project objectives.
 - Conducted user needs research and requirement analysis, including data requirements and dashboard design.
 - Developed interactive prototypes to support concept validation and design simulation before the development stage.
 - Contributed to the development and improvement of the design system to enhance consistency and efficiency in the design process.
 - Worked cross-functionally with Business Analysts and Developers to ensure design implementation met specifications and user needs.
 - Involved in designing user flows and interfaces for the digitalization and development of several enterprise solutions, including:
 - Gate Pass Management System – PT Panasonic Industrial Devices
 - Daily Management System (DMS) – PT Zekindo Kiatama Indonesia & PT Sumber Mas Autorindo
 - Manufacturing Execution System (MES) & DMS – PT Electra Mobilitas Indonesia (ALVA)
 - Computerized Maintenance Management System (CMMS) – PT Paragon Technology and Innovation
 - Problem Reporting & Tracking System (PRTS) – PT Sumber Mas Autorindo
- PT. Infosys Solusi Terpadu - Yogyakarta**
UI/UX Design, Nov 2021 - Jan 2023 (1 year, 2 months)
Experienced in designing and developing user interfaces for digital systems in the banking sector. Collaborated with cross-functional teams to ensure the resulting designs aligned with business needs, usability standards, and end-user requirements.

Responsibilities & Achievements:
 - Contributed to the development of a design system using the Atomic Design approach to improve interface consistency and scalability.
 - Collaborated with Business Analysts to validate system requirements and refine concepts before the UI design process began.
 - Created wireframes and user flow structures as an initial design phase to minimize revisions during development.
 - Designed interfaces focused on usability and user process efficiency within digital banking applications.
 - Involved in several banking projects, including:
 - BTN Internet Banking Business Portal
 - BTN Internet Banking Business
 - BTN Property Mobile
 - BTN Mobile Banking
